

Introducing a manageable, standards-based CRM solution for midsize businesses. Courtesy of HP and Microsoft.

Maximizing customer value means forging **Your company name here** relationships—and that takes sophisticated customer relationship management (CRM). But conventional thinking says that CRM solutions can be time-consuming and difficult to manage. That's why HP has partnered with Microsoft® to deliver a CRM solution designed specifically for midsize businesses.

Along with Fictional Solutions, we can give your business the guidance, service and support it needs to succeed. All told, it's an affordable CRM solution that's easier to use and manage so that you can improve overall business performance and deliver better business outcomes.

Here's how:

- **A flexible CRM environment** – the reliable and efficient HP ProLiant, HP BladeSystem and HP StorageWorks server and storage platform helps your business grow and adapt to changing business needs.
- **Industry-standard technology** – built to integrate with your existing environment for easy implementation. With more than 11 million HP ProLiant servers shipped worldwide, it's one of the most popular server brands.
- **Integrated infrastructure and management tools** – HP Insight Control Management Suite streamlines deployment and administration, letting you easily configure, adapt and maintain your server and storage hardware.
- **A strong partnership** – You get customized guidance, service and support when you need it. HP and Microsoft have collaborated for over 20 years to help customers quickly deliver business outcomes.

We look forward to working with you.
