Make sure your PCs run as fast as your business

At **Fictional Solutions**, we understand that everyone wants to work more effectively and do more with less. And we can help make it happen. By taking advantage of the latest innovations in desktop software and hardware platforms, you can increase your employees' productivity, enhance your security, and improve your business IT environment.

Outdated desktops and notebooks create a ceiling for your company's efficiency, limiting effective collaboration and communication, productivity and access to up-to-date data. Break through with Microsoft® Windows® Vista® and Office® 2007 on HP business desktops, notebooks and workstations.

Upgrade your business with powerful and simplified solutions from HP and Microsoft. With a variety of HP clients (desktops, workstations and notebooks), we can help you select the right combination of power, form factor and price that meets your company's unique needs.

Contact us today to find out more about how we can help you protect your data, increase productivity and get the most from your technology investments with HP clients running Windows Vista. We will visit you at your convenience to provide a risk-free technology assessment.

Act now to take advantage of special incentives from HP and Microsoft that make it easier and more cost-effective to upgrade your clients.

- **The HP Trade-In Program** – trade in any model, any brand of your old hardware and receive cash back when you purchase new HP products
- **HP Smart Buy Promotions** – aggressive pricing on expertly pre-configured, HP-recommended business solutions including notebooks, desktops, workstations, services, monitors and accessories. Smart Buy products are ideal for organizations looking for the best value for HP products without committing to a minimum volume requirement.
- **Microsoft Volume Licensing** – a group of programs tailored to the size and purchasing preference of your company that offer simple, flexible and affordable solutions to easily manage your licenses

We can help you chose a solution that keeps pace with the speed of your business.

Best regards,
